# Introduction

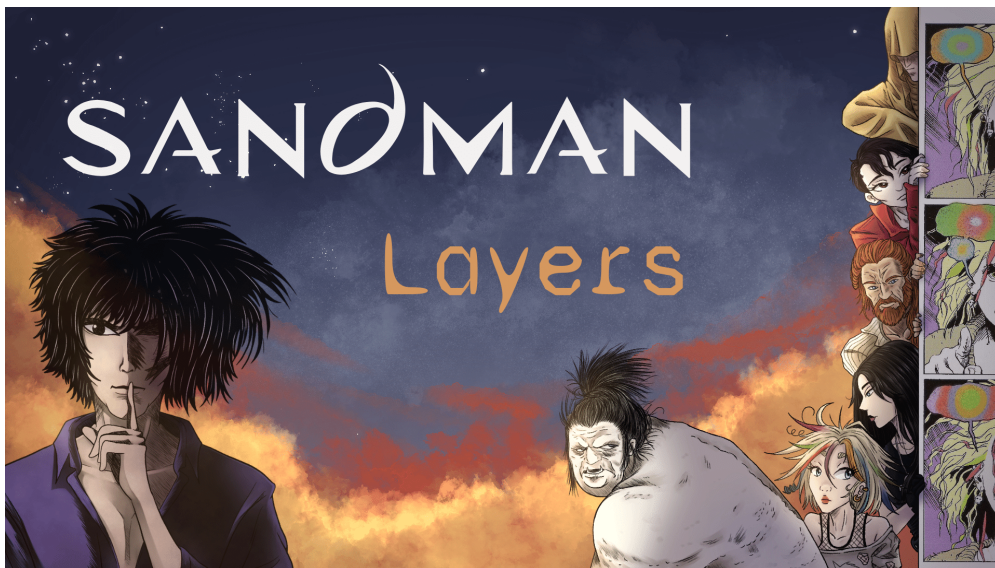

Distributed Finances is mainly based on a structure where there is a buyer and a seller market for a token. Where the pressure on this market generates projects that in less than a day have a beginning and end of earnings.

These pressures generate a situation where the actors are incentivized by a time race where they have more profit in selling fast than in holding the assets.

In addition, the participants of these markets feel external to the operation of the platforms. They are only sellers or buyers. Although there are some projects that distribute profits, the generation of ownership is not fully achieved.

We propose in this whitepaper a solution to this problem: Sandman Finance Version 2.

## Sandman Finance Project V1

The Sandman Finance Project started in Q1 2021 as Version 1.

The first version consisted in 7 layers that had multiple innovatives features such as:

- First stealth presale ever, which was sold out in less than 30 seconds.
- Different launch strategies over the layer: presale, fair launch, stealth launch, etc.
- Limited token supply on every layer.
- [Vaults](#)
- [Dividend Pools \(Kingdoms\).](#)
- [Antibot system.](#)

## Problem to be solved

We are aiming to solve the following problems:

1. Lack of value of reward token after initial hours.
2. Lack of incentive for actors to stay on the platform for the entire duration of farming.
3. Lack of sense of ownership of the platform.

## How to solve it

We are presenting the following solutions:

1. Decentralized Autonomous Treasury.
2. The Endless Ownership token.
3. NFTs with extended features.

## Who we are

We are an international multi-awarded blockchain team. We have more than 25 years of experience in General Software development and more than 7 years in blockchain.

The team has worked on 13 successful Tokens, and consulted in several real-asset tokenization projects. From inception to working project, we impact every aspect of the product.

## Sandman Finance Stats

Sandman Finance has the following track record so far

Overall Total Value Lock So Far	Over \$12,000,000
Amount of Layers / Tokens	7 Layers
Amount of NFTs Collections	7 NFTs Collections
<a href="#">Twitter Followers</a>	Over 22,000
<a href="#">Telegram Community</a>	Over 5,000
Partnerships with other projects	10 partnerships
Media exposure	Over 10 articles in various channels

# What is Sandman Finance Version 2

Sandman Finance Version 2 is the evolution of the Platform Version 1, where we aim to solve all the problems experienced by the community explained before.

In here we solve:

1. **Lack of value of reward token after initial hours.**

We do this by implementing a decentralized autonomous treasury.

2. **Lack of incentive for actors to stay on the platform.**

We solved this problem by having a share ownership approach with the endless ownership token holders/stakeholders.

3. **Lack of sense of ownership.** Also with the endless ownership token.

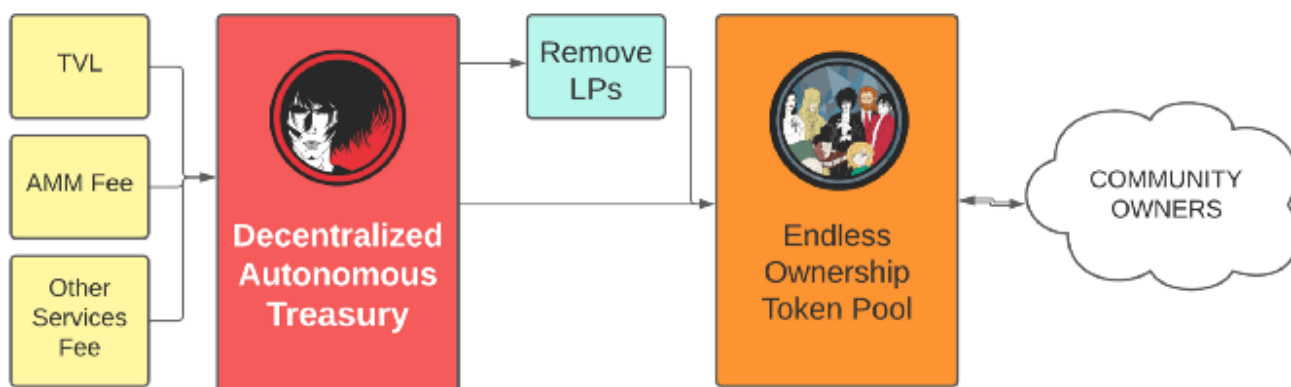

## The Endless Ownership Token

Through the **Endless** tokens distributed via the presale and farming, users will own **Sandman Finance V2** and even receive a percentage of the deposit fees plus other platform services.

On top of that, Endless token holders will participate in Project Governance through our [Snapshot Space](#).

## Decentralized Autonomous Treasury

A Decentralized Autonomous Treasury is a set of smart contracts that acts as a DAO (Decentralized Autonomous Organization). This concept is formed in practice by a set of

systems developed by the Sandman Finance team to automate the collection and delivery of profits among the loyal members of our community in an autonomous way.

## NFTs to its Core

As in version 1 of the platform, NFTs are the backbone.

What you'll get with NFTs in the platform:

1. VIP early access to Sandman V2
2. Extra governance votes
3. Access to different and exclusive features such as: gambling, harvest boosting, extra earnings and more.

## Timelines

*Presale  
Version 2 Launch  
Treasury Kick-off  
NFT Sale*

*Multiplatform Launch*

1 Q1 2022 2 Q2 2022 3 Q3 2022 4 Q4 2022

*Sandman Version 1  
Finished*

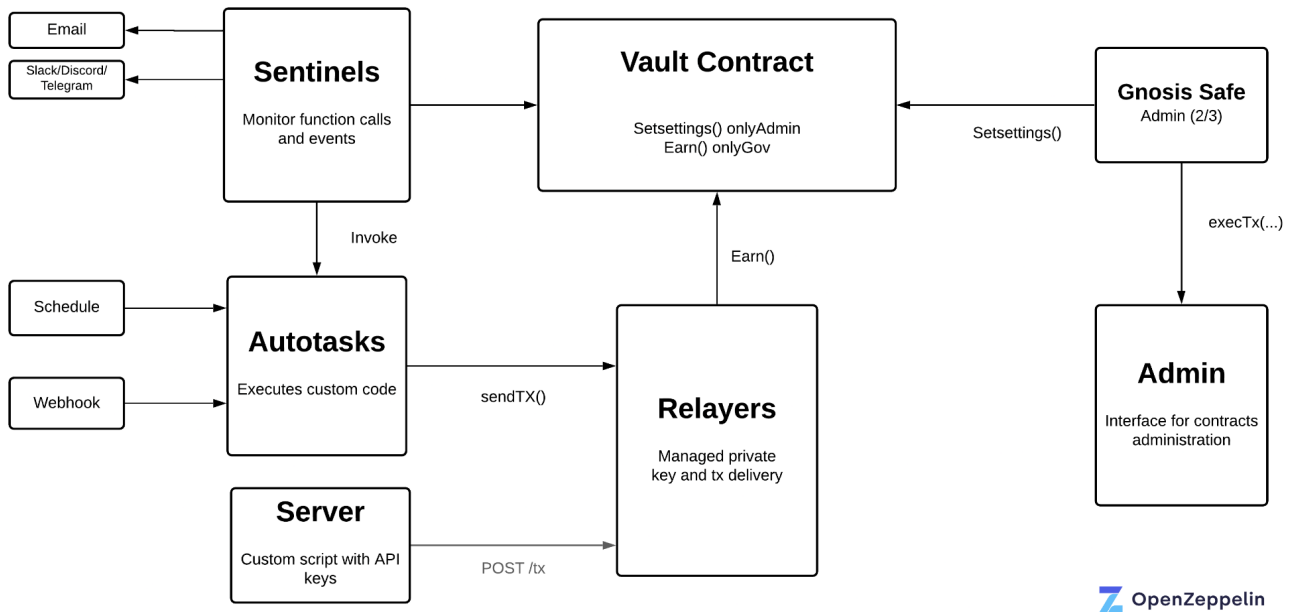

*Sandman Version 2  
Active Development*

*NFT Marketplace  
AMM Launch*

## Security Protocols

We are committed to providing the community with the best experience. Both in our apps and in the security of our contracts.

That's why at Sandman Finance we use [OpenZeppelin Defender](#) as our main DevOps tooling.

## Conclusions

Sandman Version 2 is preparing to be the evolution of DeFi 1.0 into 1.5

The main idea is to provide a better experience, and more value to the community. Where everybody has more incentive to stay on the platform for the longest time.

Explaining this by using game theory, we want everybody to be incentivized to buy and hold the token for its intrinsic value.

This is the first Community Owned Project where everybody can take profit from the treasury!

	BUY	SELL
BUY	(2,2)	(-2,2)
SELL	(-2,2)	(-2,-2)
